SUMMARY

A Software Developer specialized in designing and implementing backend solutions. Almost 2 years of experience in studying software engineering. Strong communication skills and ability to work efficiently in a team-based environment.

SKILLS

- **.NET C#, ASP.NET Core**

  Experienced in developing REST APIs using ASP.NET Core WebAPI. Know and implement things like Middleware, JWT Authentication/Authorization, Minimal API as well as Controller-based endpoints.

- **Entity Framework Core, MSSQL Server, MongoDB**

  Have a deep understanding of SQL databases (schemas, table relations, etc.). Have quite a bit of experience using such ORM as Entity Framework Core to develop DAL of my applications.

- **General skills and tools**

  - Git & GitHub
  - English B2 level
  - Collaboration & Team Work
    Several times successfully collaborated with other students within my course to develop required applications
  - Postman
  - Docker

RECENT PROJECTS

- DigiDent - Dental Clinic Managment Application   GitHub Repository

  Main features of the project: DDD & Clean Architecture, Event Driven Design, CQRS, JWT Authentication, option of PDF format for schedule, and more.

EDUCATION

B.S. Software Engineering & Business Analysis   Kyiv School of Economics | 2027
